

THE BEST CORROSION CONTROL PERFORMANCE, GUARANTEED!

Product Description

Termarust Series TR2100 High Ratio Co-Polymerized Calcium Sulfonate Self-Priming Topcoats

“Self-Priming Topcoats” are pigmented High Ratio Co-Polymerized Calcium Sulfonate coatings designed and engineered exclusively for:

A) **ENCAPSULATION** (overcoat) of:

- Existing aged leaded paint
- Vinyl, coal tar epoxy, polyurethane, epoxy mastics, acrylics, organic or inorganic zinc
- Galvanizing metallizing
- Tightly adhered contaminant free rust

B) **RE-COATING** of new or prepared structural steel. Ideal for use with High-Pressure water cleaning and Ultra-High Pressure (UHP) water jetting.

The Termarust 2100 High Ratio Co-Polymerized Calcium Sulfonate proprietary formulation has the unique ability to:

- Neutralize acidity
- Create a hydrophobic barrier
- Bonds ionically and thoroughly wets the surface profile making it ideal for the reclamation and long term protection of:

- bridges
- steel structures
- cable suspension systems
- industrial infrastructures
- highway overpasses
- utility towers
- pipelines

Termarust 2100 High Ratio Co-Polymerized Calcium Sulfonate is an outstanding, easy to use, maintenance coating where long-term spot repairs are required.
